

## CONSTRUCTION UPDATE – SEPTEMBER 2018

### Gateway Motorway at Compton Road, Stretton

Construction activities are ongoing along the Gateway Motorway and Compton Road as part of the Logan Enhancement Project. The following activities will be undertaken over the coming months (both day and night shifts) and are expected to generate some impacts, including noise:

- relocating Energex powerlines on Compton Road from Tuesday 2 October 2018 for about one week. This work will be undertaken by Energex and involve traffic changes on Compton Road including day-time single lane closures between 9am and 3pm
- night-time installation of bridge girders for the new Gateway Motorway northbound off-ramp to Compton Road. This activity will be undertaken from Monday 1 October and continue for about one week. This will also include night-time mobilisation of the crane to the work area from 27 September 2018
- commencing bridge piling as part of the widening of the existing Compton Road bridge over the Gateway Motorway
- removing a section of the existing timber noise barrier along Compton Road – this will be replaced by a new noise barrier as part of the project
- installing traffic barriers along Compton Road in preparation for road widening works
- continuing to construct the new Gateway Motorway southbound on-ramp from Compton Road, including placement and compaction of material.
- ongoing works to widen the Gateway Motorway south of Compton Road to six lanes including various traffic changes, drainage, earthworks, installing concrete barriers, and asphaltting.
- continuing with the road resurfacing works on the Gateway Motorway from Compton Road to Logan Road which includes ramp closures and the motorway reduced to a single lane at some locations.

We apologise for any inconvenience caused by these activities and appreciate your patience while we continue to undertake these works.

#### Subscribe to keep updated

Keep updated about construction activities in your area by subscribing to the project database. You will receive regular emails keeping you updated about construction activities, traffic changes and interesting project news.

You can subscribe by visiting the project website or by contacting the project team (see 'for more information' over the page).
