

WORKS NOTIFICATION – UPDATE

February 2019

Construction of the noise barrier on Mt Lindesay Highway near Trinity Way is now underway. The noise barrier (refer to the map below) will extend approximately 630m in length, and 1.5m-6m high depending on natural ground levels. It will consist of concrete panel walls, supported by steel vertical posts. Please note this information supersedes previous information provided in late 2017 about this noise barrier.

How are noise barrier locations determined?

As part of the project, a road traffic noise assessment was undertaken across the project corridor.

At locations where the noise assessment shows that predicted noise levels from the completed project infrastructure will exceed Queensland Government road noise guidelines, noise mitigation including noise barriers are being built. It should be noted that while noise barriers are designed to reduce perceived loudness, they do not eliminate noise completely.

Construction of the noise barrier has commenced, and is expected to take approximately two months, construction and weather permitting.

LOGAN ENHANCEMENT PROJECT

What to expect

Access to the Mt Lindesay Highway noise barrier construction area will be via the Mt Lindesay Highway service road. Construction activities will include:

- earthworks to prepare alignment, excavation of holes for footings
- erecting vertical posts, and installing pre-fabricated concrete panels
- painting / anti-graffiti treatment
- traffic control and reduced speeds will be in place to ensure the safety of motorists and workers
- the use of excavators, trucks, mobile crane, light vehicles.

All works are scheduled to minimise impacts on the community and motorists. We thank you in advance for your patience during these works.

About the project

Transurban Queensland's \$512 million Logan Enhancement Project includes upgrading parts of the Logan and Gateway motorways, improving key congestion hot spots (Logan Motorway/Mt Lindesay Highway/Beaudesert Road interchange and the Wembley Road/Logan Motorway interchange) and constructing new south-facing ramps on the Gateway Extension Motorway at Compton Road. Major construction is underway with the project anticipated to be completed in 2019.

Keep updated about traffic changes

During construction of the Logan Enhancement Project we encourage you to plan ahead. For more information about upcoming traffic changes, view the [Road Users](#) page on the project website. Traffic information will also be posted on the [Queensland Traffic website](#) and provided to the 131940 call centre.

For more information about construction activities associated with the Logan Enhancement Project, please visit the project website (see below) or follow us on [Facebook](#).
